- Any quote provided is valid for 30 days from submission.
- All costs quoted are subject to VAT at standard rate.
- Parts & Workmanship is warranted for a period of 6 months for o/haul and 12 months for rewind.

ALTERNATOR OVERHAUL AND REWIND

On machine receipt, a pre inspection is undertaken, photographically logging machine condition and its physical arrangement before the full inspection procedure begins.

- Detailed inspection is conducted through the dismantling process, with all critical dimensions noted. Wound components are subjected to an in-depth analysis. All components are cleaned and checked for faults.
- Rewinds utilise class H resins and insulation materials as IEC34 pt1 for rotating electrical machines, and classes of insulation systems.
- Severe environment total winding protection is included as standard.
- Bearings are replaced with industry approved high quality bearings.
- Alternator is re-assembled and dynamically tested with configured AVR. Detailed test reports are provided.
- Machine surfaces are coated with rust inhibitor and client's paint finish prior to despatch.
